Table 1: Expected values (€) of different decision strategies in the MPL task, averaged across high and low positions.

maxEV: Choices that maximize expected value.

onlyLotteries: All choices are lotteries.

onlySure: All choices are sure options.

onlySureOrLotteries: Always choosing the option (sure or lottery) with the higher expected value.

onlyCenter: Switching at the midpoint of the MPL.

random: Random switching point.

randomAndRandomOrder: Random choices allowing multiple switches (non-monotonic behavior).
